ABOUT ME

Graduate of computer science with a zeal for innovation. Looking for a role where I can grow and learn from experienced team members and desire to enhance social events through technology. I have intrest in Web development and react native, and I want to learn and gain experince in solving real world problems and challenges.

Personal Projects

Glaucoma detection using deep learning, FYP, University of Central Punjab
Aug 2021 - Jul 2022

We created a model to detect Glaucoma in early stage our model takes an input image and it shows outputs with the binary output,this will reduce the workload of ophthalmologists in fact workers of eye shop can use this model integrated to their eye testing machine without having any technical knowledge.

Hospital Management System in C++, Project, (Mobile Application Development)

I made this project using C++ and concepts of OOP, uses the concept of Filing to store and retrieve data. All files are generated by the program, Has login and forget password feature, able to add and remove patients, assign rooms, assign workers, make appointments, able to buy supplies, View available doctors with their timings and fee.

Portfolio Website, Semester project , (Web Application Development)

A basic resume website using css, HTML,javascript. It contained,
✔ About me
